Casino Revenue Performance Review

Presented By Robert Velazquez

Sky River Casino
Revenue Review: 2024 vs 2025

Analytical Approach

- Researched casino terminology and business operations to establish context
- Validated the dataset by reviewing table relationships and overall integrity
- Enriched raw transactional data with calculated fields and creating more business attributes
- Used XLOOKUP to enrich transactional records with Theme, Device Type, and Location attributes
- Focused on precision: answering business questions accurately over metrics

Data Preparation & Enrichment

Patron_ID	Device_ID	Date	ie_On_Dev	tal_Buy_In	Walk_With	wg_Wager	Year	Gaming_Rev	Theme	Location	Device type_ID	Device type name

1/1/2024	366706	402	1	1	15	15	8	38	2024	38

Why This Matters

Enriched data enables dimensional analysis. You can now segment performance by theme, device type, and location—moving from aggregate reporting to actionable operational intelligence.

Key Enhancements

- Gaming Revenue: Calculated from buy-in subtracted by total walk-with amounts
- Year: Extracted from transaction dates for period comparison
- Total Revenue: combined from food_rev, bev_rev, and other_rev
- Avg Spend per Cover: Key performance metric for restaurants
- Theme, Device Type: Added via XLOOKUP from reference tables

Data Quality Assessment

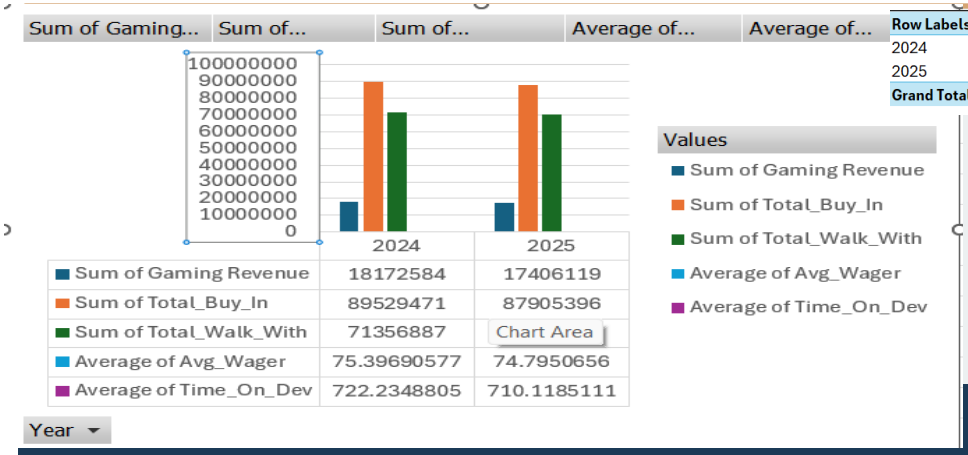

Key Findings

- 6,512 Patron IDs blank (anonymous play)
- One device missing location attribute
- Food & Beverage transactions with zero covers recorded

Handling & Assumptions

- Anonymous patrons: Retained for overall revenue analysis to capture complete customer spending picture
- Missing location: Documented and tracked separately; one device isolated from location-based analysis
- Zero-cover transactions: Excluded only from Avg Spend per Cover KPI (undefined metric) but included in revenue totals

Executive Gaming Overview

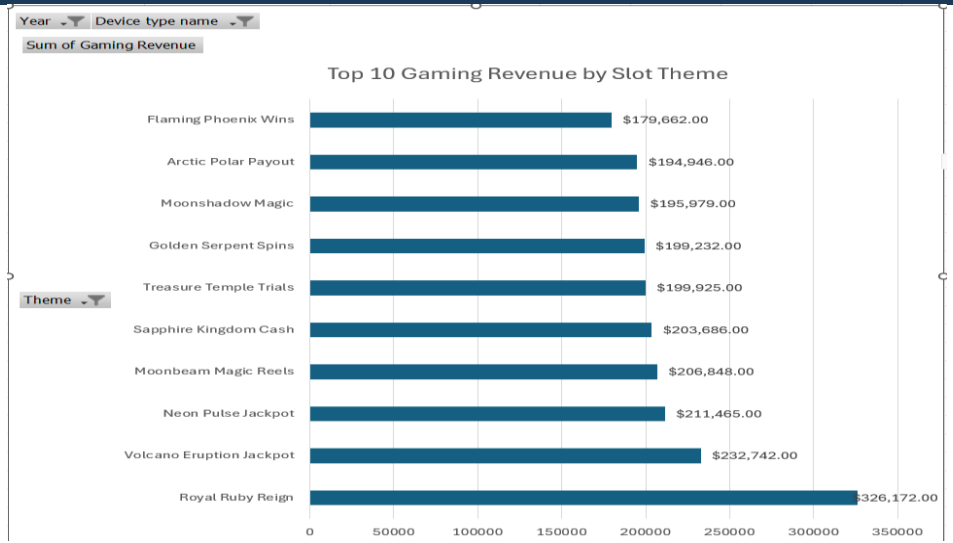

Row Labels	Sum of Gaming Revenue	Sum of Total	Sum of Total_Walk_With	Average of Avg_Wage	Average of Time_On_Dev
2024	18172584	89529471	71356887	75.39690577	722.2348805
2025	17406119	87905396	70499277	74.7950656	710.1185111
Grand Total	**35578703**	**177434867**	**141856164**	**75.09807393**	**716.2187367**

Strategic Baseline

- Overall gaming activity decreased from 2025 vs 2024, with decreases in gaming revenue, buy in, and walk with.
- Average wager and time on device remained relatively stable, suggesting player behavior did not change much.
- The consistency across these key metrics indicates more of a trend then a significant change in a single performance area.

Question 1: Top-Performing Slot Themes

Year	2025
Device type nar	Slot

Row Labels	Sum of Gaming Revenue
Royal Ruby Reig	326172
Volcano Eruptic	232742
Neon Pulse Jacl	211465
Moonbeam Mag	206848
Sapphire Kingd	203686
Treasure Templ	199925
Golden Serpent	199232
Moonshadow M	195979
Arctic Polar Pay	194946
Flaming Phoeni	179662
Grand Total	**2150657**

Methodology

Filtered Year = 2025
Device Type = Slot
Ranked by Gaming Rev

Key Finding

Royal Ruby Reign generated the highest Gaming Revenue ($326,172)

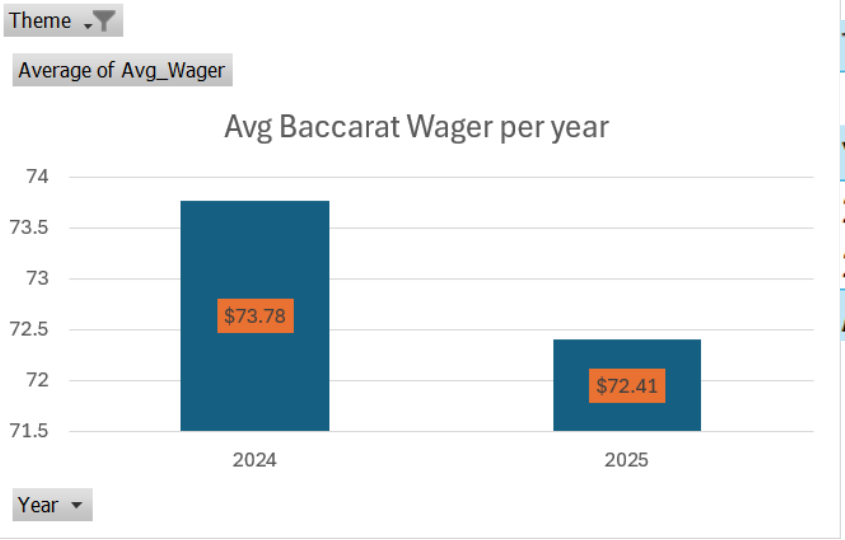

Business Insight

Gaming Revenue varied across slot themes, indicating certain themes perform better then others. This highlights opportunities to evaluate game performance and optimize the slot mix.

Recommendation

Evaluate the operational characteristics of top performing themes to identify opportunities for game placement, machine mix, and future floor planning.

Question 2: Baccarat Player Behavior

Theme	Baccarat
Year	**Average of Avg_Wager**
2024	73.77858177
2025	72.41238671
Avg Wager	**73.11012565**

Methodology

Filtered Theme= Baccarat
Calculated Average Wager by Year Compared 2024 vs 2025

Key Finding

Average wager slightly decreased from $73.78 to $72.41 (1.86%)

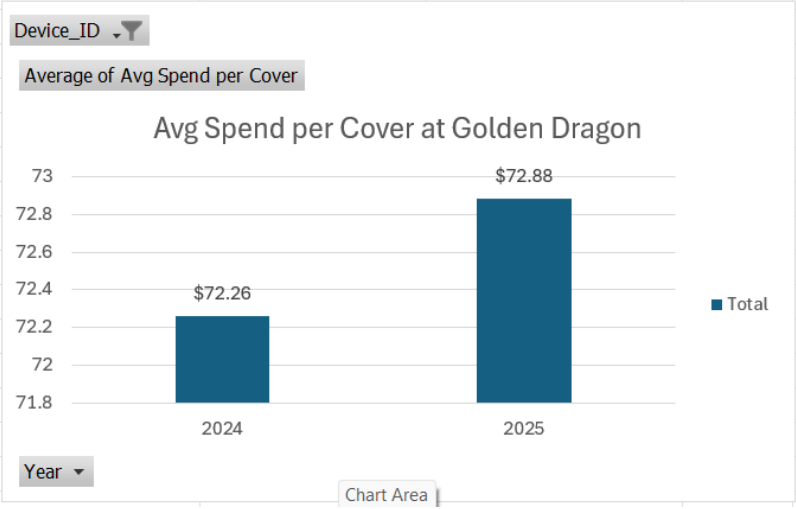

Business Insight

The Average Wager remained consistent across both years, despite the modest decline in overall gaming activity.

Recommendation

If Baccarat revenue changes in the future, evaluate player volume and session frequency along with avg wager to understand the underlying drivers.

Question 3: Golden Dragon F&B Performance

Year	Average of Avg Spend per Cover
2024	72.26176471
2025	72.88311618
Grand Total	**72.57294725**

Methodology

Analyzed Device_ID 303 (Golden Dragon), Excluded zero-cover records, Calculated Average spend per Cover

Key Finding

Average spend per cover slightly increased from $72.26 to $72.88 in 2025 (+.9%)

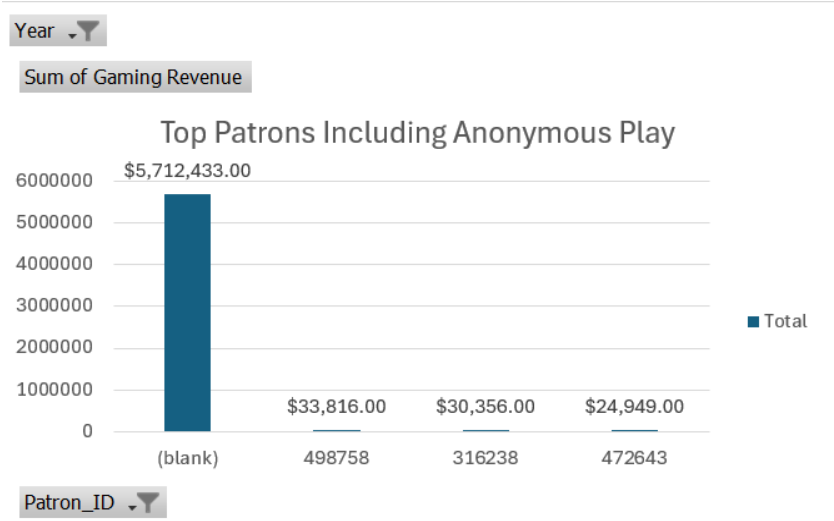

Business Insight

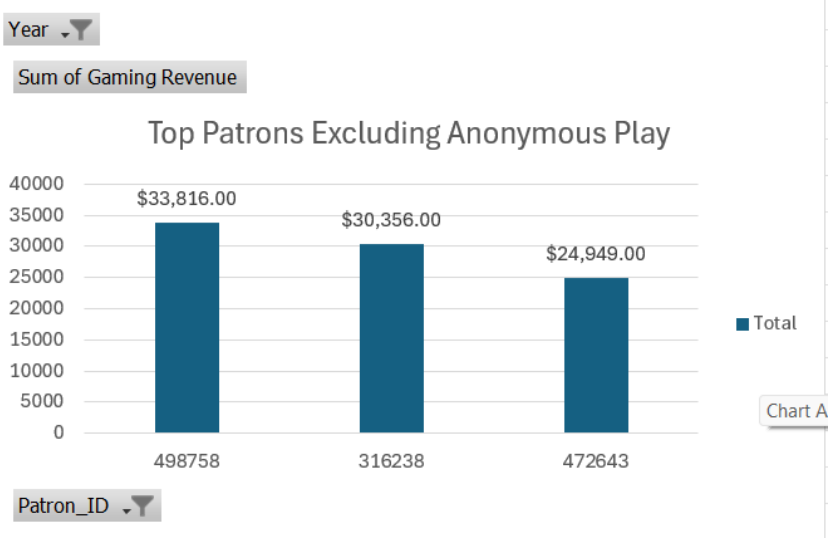

Average spend per cover remained highly stable between years, suggesting consistent guest spending behavior at Golden Dragon.

Recommendation

If restaurant revenue changes, evaluate guest traffic and cover counts in addition to average spend per cover to better understand the underlying drivers.

Question 4: Top Revenue-Generating Patrons

Business Insights

- Anonymous patron activity generated a substantial share of gaming revenue, limiting the ability to attribute revenue to individuals
- To answer the question accurately, anonymous records were excluded from the ranking allowing the top 3 identified patron to be evaluated.

Recommendation

- Increase player card enrollment and identified play to improve customer analytics, loyalty spending, and marketing opportunities
- Review anonymous patron tracking processes to determine if we could get identification while maintaining customer privacy

Executive Summary

Key Findings

- Gaming activity decreased modestly from 2024 to 2025
- Royal Ruby Reign was the highest performing slot theme in 2025
- Baccarat average wager remained stable over the 2 years
- Golden Dragon avg spend per cover remained stable after excluding zero-cover transactions
- Anonymous patron activity represented a significant share of gaming revenue

Data Quality Observations

- Enriched data using XLOOKUP
- Documented assumptions and analytical methodology
- Identified anonymous patron activity as a limitation for customer level analysis
- Identified zero cover transactions and applied a documented methodology after stakeholder clarification

Strategic Opportunities

- Continue monitoring slot theme performance
- Increase player card participation
- Review operational causes of zero cover transactions
- Improve reporting of identified versus anonymous gaming activity

Thank You!

I welcome your questions regarding methodology, data assumptions, or strategic implications of these findings.
